Priority:	Normal
Type:	Note

Jonathan,

Thank you. Two things:

- 1) (b)(5)
- 2) Please have the program / federal staff evaluate whether it has been made clear to her that support is readily available if she chooses to parent the child, or if she decides to offer the baby for adoption. Sometimes adoption is an option that is not well-developed, even in some pregnancy resource settings. If the clinician feels that there has been adequate treatment of these options, no follow up is necessary on that front.
- 3) Please

Subject: Update on minor at SWK Campbell requesting TOP
Importance: High

Update on minor at SWK Campbell in Arizona who is requesting abortion to terminate pregnancy resulting from rape in home country:

- The minor is 16 years of age. She turned 16 on (b)(6) 17.

- The minor is pregnant as a result of rape in home country by a group of unknown men. She reports being approached by unknown men in country of origin, who covered her mouth with a piece of cloth, and then then lost consciousness. She woke up later in an unknown location with her clothes off. She was 15 years old at the time of the rape. She denies having had other sexual experiences.
- The minor was evaluated by OB/GYN services on January 10, 2018, without concerns.
- Gestational development: Based on ultrasound conducted on January 10, the minor was then 10 weeks 1 day. Based on this measurement, gestational age is today **11 weeks 1 day**.
- ORR has not received any report that there is a medically indicated necessity for abortion for the life of the minor.
- The next routine medical appointment is scheduled in two weeks.
- On January 11, the minor attended options counseling at Choices Pregnancy Center (CPC), a crisis pregnancy center from the HHS approved list. The minor was provided with information and reported that her questions were all answered. The minor was provided with “appropriate drawings to color and with Bible verses,” per the SIR.
- On January 16, a family session was conducted, disclosing to the minor’s parents in home country her pregnancy and her decision to pursue TOP. The minor’s clinician was involved. The minor requested that the notification not include the information that that the pregnancy was a result of rape.
- The minor spoke with a pastor from her faith tradition on January 15, 2018.
- On January 16, two family sessions were conducted, disclosing to the minor’s parents in home country her pregnancy and her decision to pursue TOP. The minor’s clinician was involved. A first family session was held with the minor, and the second session the minor asked not to participate. The minor requested that her parents not be informed that the pregnancy is a result of rape, but the family reported that their daughter may have been raped. The minor’s father advised that the parents “agreed to end the pregnancy” and expressed that “if minor is requesting to end the pregnancy they supported her.”
- The SIR addendum for the family notification explains: **“On 1/16/2018 at approximately 3:30 p.m., clinician (b)(6) completed a family session with minor and her father. Minor requested that clinician inform her parents she was pregnant and that she was requesting to end her pregnancy. Minor requested that**

clinician not disclose how minor became pregnant. Furthermore, clinician informed minor’s father that minor was pregnant and requesting

to end the pregnancy. Minor's father was notified that minor was taken to the doctor and it was confirmed she is approximately 10 weeks

pregnant. Minor's father appeared calm and asked clinician if minor could be reunified with his older daughter. Minor's father requested

time to speak to his wife before making a decision on minor's request to end her pregnancy. On 1/16/2018 at approximately 5 p.m., clinician

(b)(6) completed a family session with minor's parents. Minor requested not to be present for the second family session.

Clinician spoke to minor's father who conveyed he had spoken to his wife and decided that they agreed to end the pregnancy. Clinician asked

minor's father to clarify what he agreed to. Minor's father stated he and his wife spoke and consider that minor may have been raped on her

way to school. Minor's father shared that in their home town if a woman is raped, the expectation is that she will marry the man that raped

her. Minor's father stated that he and his wife are not sure that the pregnancy was a result of minor's choices or of a rape. Minor stated that

if minor is requesting to end the pregnancy they supported her. Minor's father also shared that minor is young and still a child herself to be raising a child of her own. Minor's father appeared calm and was respectful as he shared the aforementioned."

- At this time the minor continues her request for TOP "due to the pregnancy being a result of sexual abuse."
- All steps outlined by the ORR Director have been completed. Parental notification has been conducted, in which the family expressed support for their daughter to receive the abortion. The minor has received options counseling from an approved provider. The minor has received spiritual counseling from a pastor of her faith group (evangelical Christian).
- Please advise next steps.

Jonathan,

- 1) (b)(5)
- 2) Please have the program / federal staff evaluate whether the following information has been made adequately clear to the youth, and if not, ask that they offer her the option of receiving more information on these subjects, if they feel they can do so consistent with her mental well being:
 - a. that support is readily available if she chooses to parent the child;
 - b. that support is readily available if she decides to offer the baby for adoption, and that she has been given the opportunity to discuss adoption in depth if she chooses;
 - c. that in some cases, women or minors who have had abortions have expressed regret from having done so, even when pregnancy is the result of sexual assault, and that if she chooses the program can provide for her some written examples of the personal testimony of such women.
